

# SCORE

## **397. STARS**

**At night, The17 go to a dark place outside a city,  
where a lot of stars are visible**

**Each individual looks up and chooses a star**

**Observe the fluctuations in brightness of the star,  
the way it twinkles**

**A signal is given, and each person starts making  
any non-verbal sound of their choosing,  
while they continue to watch their star**

**Each person varies their sound in a pattern  
based on the twinkling of their star**

**After a few minutes of making sounds together  
and listening to one another, each person fades out  
at their own discretion**
